DETAILED ACTION

Allowable Subject Matter

13. Claims 1 – 17 are allowed. The following is an examiner's statement of reasons for allowance: Prior art shows a matrix-bearing cylinder and a doctor; however, fails to show a matrix-bearing cylinder supported specifically on a first slide, of which first slide is vertically constrained on the vertically-developing frame and slidable vertically with respect thereto and a second slide constrained on the vertically-developing frame and sliding vertically with respect thereto and at least a doctor supported specifically on the second slide; and means for relatively positioning the first slide and the second slide relative to the vertically-developing frame. Prior art also fails to teach a maneuvering screw having a vertical axis, on which maneuvering screw are coupled a first nut, which is solidly constrained to the first slide, and a second nut which is solidly constrained in translation along the vertical axis to the second slide and which is mobile in rotation about the vertical axis with respect to the second slide, which vertical axis is also a rotation axis of the second nut and the first nut; the maneuvering screw is used for relative positioning of the doctor with respect to the matrix-bearing cylinder and the height adjustment of the matrix-bearing cylinder itself with respect to the mobile rest plane.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
